|                          | <p>All works must be designed, constructed and carried out in accordance with FNQROC Development Manual requirements (as amended) and to the satisfaction of Council’s Chief Executive Officer.</p>   |  |
|                          | <p>Reason: To ensure the development does not have a detrimental effect on the amenity of the surrounding land in accordance with relevant code/s and policy direction.</p>   |  |
| <p>5. Access</p>         | <p>The applicant/developer must:</p> <ol style="list-style-type: none"> <li>a. Engage a suitably qualified engineer to confirm the access driveways are suitably located providing safe and efficient access to the site, and provide written confirmation to the satisfaction of Council’s Chief Executive Officer; and</li> <li>b. Construct commercial access crossovers in the locations shown on the approved plans, except where modified by item a. above. The crossovers must be constructed (from the edge of the road pavement to the property boundary of</li> </ol> | <p>Technical details are to be submitted to council prior to issue of a Building Approval and maintained for the life of the development</p> |

the subject lot) in accordance with the FNQROC Development Manual, to the satisfaction of Council’s delegated officer; and

- c. Ensure that any redundant vehicle crossovers are removed and the ground surface made good.

Reason: To provide development with access in accordance with council standards.

6. Parking/Internal Driveways

Prior to the commencement of the use

The applicant/developer must provide a minimum of 16 on-site parking spaces, including 1 PWD space and 1 emergency vehicle bay.

All spaces must be sealed, line-marked and appropriately drained and designed in accordance with Australian Standard AS2890:1 Off Street Parking – Car Parking and Australian Standard AS2890.6-2009 Off-street parking for people with disabilities as applicable.

All car parking facilities must be maintained to a safe operating standard at all times thereafter.

Reason: To provide development with parking in accordance with council standards.

7. Stormwater Drainage

Prior to the commencement of works and during the operation and life of the development

The applicant/developer must:

- a. Take all necessary steps to ensure a non-worsening effect on surrounding land as a consequence of the development; and
- b. Ensure development is undertaken in accordance with the approved Stormwater Management Plan SKC01 and supporting material, prepared by STP Consultants in particular:
  - i. Stormwater management must meet or exceed the standards of design and construction set out in the Queensland Urban Drainage Manual (QUDM) and the FNQROC Development Manual to the satisfaction of Council’s Chief Executive Officer; and
  - ii. Erosion and Sediment Control Plan must that meet or exceed the Soil Erosion and Sedimentation Control Guidelines (Institute of Engineers Australia) to the satisfaction of Chief Executive Officer.

Reasons: To convey stormwater legally and in an environmentally responsible manner and to manage and

minimise the risk of causing environmental harm to receiving waters, damage to council infrastructure, and unnecessary financial burdens to council and the community in accordance with relevant code/s and policy direction.

8. Landscaping

The landscaping of the site must be carried out generally accordance with the landscaping shown on the Proposed Site Plan (SD02 rev 7), and irrigated, mulched and maintained to the satisfaction of Council’s Chief Executive Officer.

Prior to the commencement of the use and maintained during the operation and life of the development

Reason: To ensure the development does not have a detrimental effect on the amenity of the surrounding land in accordance with relevant code/s and policy direction.

9. Lighting

a. Outdoor lighting must be designed, located and installed to prevent light spillage to cause nuisance to neighbours and must be provided in accordance with Australian Standard 1158.1 – Lighting for Roads and Public Spaces.

Prior to the commencement of the use and maintained during the operation and life of the development

b. Illumination resulting from direct, reflected or other incidental light emanating from the subject land does not exceed 8 lux when measured at any point 1.5m outside the property boundary of the subject site. The lighting fixtures installed on site must meet appropriate lux levels as documented within Australian Standard 4282 – Control of the Obtrusive Effects of Outdoor Lighting.

Reason: To ensure that the use does not cause a light nuisance to nearby sensitive receptors, and to ensure that a nuisance is not caused to the use from other nearby light sources in accordance with the Queensland Environmental Protection Act 1994 Section 440.

10. Water Supply

The development must be connected to Council’s water service in accordance with FNQROC Development Manual standards (as amended) to the satisfaction of Council’s Chief Executive Officer.

Prior to the issue of a Building Approval

Prior to the water service connection works commencing, a request for a Plumbing Connection is required to be submitted with detailed hydraulic drawings. The connection must be approved by Council prior to the property connection work being undertaken.

Reason: To ensure that the premises is appropriately serviced by reticulated water supply infrastructure in accordance with relevant code/s and policy direction.

11. Sewerage Connection

Prior to the issue of a Building Approval

The development must connect to Council’s reticulated sewerage system in accordance with FNQROC Development Manual standards (as amended) to the satisfaction of Council’s Chief Executive Officer.

Prior to the property connection to the existing sewer main, a request for a Property Connection must be lodged with Council’s Chief Executive Officer. The connection must be approved by Council prior to the property connection work being undertaken.

Reason: To ensure that the premises are appropriately serviced by Council infrastructure where located in a service area for a sewerage service in accordance with relevant code/s and policy direction.

12. Minimum Floor Levels

Prior to the issue of a Development Permit for Building Works

Floor levels must achieve immunity from flood hazards by ensuring floor levels for new buildings or structures (other than Class 10 Buildings and Structures) achieve a finished floor level of 12.14m AHD.

Note: the draft drainage study forming part of the Yarrabah Masterplan 2021 provides guidance on flood depth. The site is mapped with an indicative flood depth of 0.5-1.0 m across the site and identifies a maximum flood level of 11.17 to 12.81. Applying a maximum flood depth of 1m from the lowest level of the site of 10.84 m AHD (south eastern corner), a finished floor level 12.14 m AHD is required (11.84 plus 300mm).

Reason: To ensure developments are appropriately immune from rising storm tide /flood water in accordance with relevant code/s and policy direction.

13. Bushfire Management

During the operation and life of the development

The Gindaja Treatment and Healing Centre Business Continuity Plan shall be reviewed and updated as necessary to addresses actions to be undertaken during a bushfire event.

Reason: To protect development from bushfire hazards in accordance with relevant code/s and policy direction.

14. Acid Sulphate Soils Management

Development does not disturb acid sulfate soils or potential acid sulfate soils. Where disturbance is unavoidable an acid sulfate soils investigation is to be conducted. Should the soils and groundwater investigations reveal the presence of acid sulphate soils or potential acid sulphate soils, an Acid Sulphate Soils Management Plan must be prepared and complied with.

Reason: To ensure potential adverse impacts on the natural and built environment, including infrastructure and human health as a result of acid sulphate soils are avoided in accordance with relevant code/s and policy direction.

Prior to the issue of a Development Permit for Building Works

15. Refuse Facilities

The waste storage area is to be of sufficient size to house all garbage bins including recycling bins. The waste storage is to be suitably paved, with a hose cock fitted in close proximity to the enclosure and drain to sewer via a legal sewer connection.

Where the refuse truck must enter the site for waste collection, access roads and driveways must be designed and constructed to accept vehicle loadings of not less than G.V.M 33 tonnes.

Reason: to ensure protection of matters of public health and amenity in accordance with relevant code/s and policy direction.

During the operation and life of the development

16 Electricity Supply

Where Ergon Energy requires the installation of a padmount, transformer or substation to augment their network, details of any electrical padmount or substation positioning must be endorsed by the Chief Executive Officer.

Prior to the issue of a Development Permit for Building Works

# **Assessment Manager Advice**

1. Infrastructure Charges do not apply to this development.

2. Further Permits Required

a) Building Works

A Development Permit for Building Works to carry out building works prior to works commencing on site.
