

# Council Talks

## Redesign - Ambrym Street - August 2023

Council currently builds 6-10 social houses a year. To build more houses serviced land (water, sewerage, electricity, drainage) is required.

The large piece of land (shown in yellow) between Ambrym Street and Backbeach Road:

- is serviced with water, sewerage and electricity
- is a good location for new houses, that can be built without the cost and time taken to build a new road, water, sewer and electricity
- Council can spend more on building houses than on building roads.

For safety reasons, access to the land should not be from Back Beach Road. The same way that houses on Schrieber Street don't access from Back Beach Road.

Consultation is the first stage of the redesign.

Engagement will commence in early August 2023.
